

I feel that the Instant Traffic and weather is great and they should leave it alone. These two services are great for truck drivers and any individual traveling. It has really kept us from getting into the congested areas when we are working or traveling for other purposes. It looks to me like they would want to keep it on the air, so they could avoid the construction, accidents, etc. This has to help the workers, emergency services, etc. So they just need to leave it alone, and let it stay on the air.
